SUMMARY

CSE graduate with hands-on experience in full-stack software development and AI-powered applications. Skilled in React.js, Node.js, Express.js, PostgreSQL, Python, and RESTful API development, with experience building and deploying applications using RAG, LLMs, vector search, and Gemini APIs.

EDUCATION

United International University
B.Sc. in Computer Science and Engineering
Ghatail Cantonment College
HSC, Science

Dhaka
March 2022 – July 2026
Tangail
2017 – 2019

EXPERIENCE

Freelance Software Developer

2025 – Present

Self-Employed

Dhaka, Bangladesh

- Developed full-stack web applications using PostgreSQL, Express.js, React, and Node.js (PERN).
- Designed RESTful APIs, database schemas, authentication systems, and responsive interfaces, with hands-on testing and deployment.

PROJECTS

ResearchPilot AI | *React, Node.js, Express, PostgreSQL, pgvector, Prisma, Gemini* [GitHub] [Live Demo] 2026

- Built an AI-powered research assistant for semantic search and citation-grounded question answering over uploaded research papers
- Implemented PDF processing, document chunking, Gemini embeddings, pgvector similarity search, and retrieval-augmented generation (RAG)
- Developed JWT-based authentication, collection management, document processing, and RESTful APIs using Node.js and Express

LumenLearner | *React, Node.js, Express, PostgreSQL, Gemini, RAG* [GitHub] [Live Demo]

2025 – 2026

- Developed a full-stack learning management platform with separate Admin, Instructor, and Student workflows
- Implemented course and lesson management, enrollment, progress tracking, quizzes, assignments, grading, and role-based authentication
- Integrated Gemini-powered course assistance with RAG to provide context-aware answers based on course materials

AI-Powered Onboarding Platform | *React, Node.js, Express, PostgreSQL, AI* [GitHub] [Live Demo] 2025 – 2026

- Developed an AI-powered employee onboarding platform with role-based workflows for Employees, Managers, and HR Admins
- Implemented onboarding plans, task tracking, document management, analytics, and JWT-based authentication using the PERN stack
- Integrated Gemini-powered task generation, document summarization, feedback analysis, and RAG-based document question answering

Extensive Medical Hub | *PHP, MySQL, HTML, CSS, JavaScript* [GitHub]

2024 – 2025

- Developed a healthcare-focused web application for organizing medical information and providing user-oriented healthcare services
- Implemented backend functionality, database operations, user workflows, and responsive web interfaces
- Designed and integrated relational database structures using MySQL for reliable data management

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL, C/C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, pgvector

AI/ML: Generative AI, RAG, LLMs, Gemini API, TensorFlow, PyTorch, Scikit-learn, OpenCV

Tools: Git, GitHub, Docker, Prisma, Supabase, Postman, VS Code

Concepts: JWT Authentication, Vector Search, Semantic Search, MCP
